## EXPERIENCE

### iOS Developer

Dot Pixel Ventures

📅 08/2023 - 08/2025

📍 Ahmedabad, India

- Developed native iOS applications using Swift, emphasizing performance and clean architecture.
- Integrated RESTful APIs to ensure seamless backend communication.
- Constructed user-friendly interfaces utilizing UIKit and basic SwiftUI.
- Executed debugging and testing processes to enhance app performance.
- Managed submissions and updates for App Store, including provisioning profiles.

## SKILLS

Tableau and SQL      Python

Data cleaning and analysis

Swift      MVC architecture

Realm      Firebase

Protocols and extensions

Sourcetree      Postman

## EDUCATION

BE in  
Information  
Technology  
LJ University

CGPA  
**9.00** / 10.0

📅 08/2022 - 05/2025

Diploma in  
Information  
Technology  
Gujarat  
Technological  
University

CGPA  
**9.03** / 10.0

📅 08/2019 - 06/2022

## SUMMARY

Career began as an iOS Developer, focusing on user-centric mobile applications and mastering clean architecture and structured problem-solving. Developed a strong interest in data analytics, emphasizing pattern recognition and insight generation. Currently transitioning into Data Analytics/Data Science with proficiency in Python, SQL, and visualization tools. Aims to leverage development experience and analytical skills to drive data-informed decision-making for organizations.

## PROJECTS

### Tableau Projects

🔗 <https://public.tableau.com/app/profile/siddharth.dave2404/vizzes>

### MusicNest

Personal Project | Swift, SwiftData, AVFoundation, UIKit

- Implemented core features including **local music playback**, **playlist creation**, **favorites**, **music sharing**, and **audio downloads**.
- Enabled **audio extraction from YouTube**, allowing users to save and play extracted tracks within the app.
- Built a **custom audio player** with support for **play/pause**, **next/previous**, **forward/backward seeking**, and **"Play Next" queue** functionality.
- Designed a **custom tab bar interface** for a polished, modern user experience.
- Integrated **SwiftData** for offline music storage, playlist management, and state persistence.
- Added **search functionality** for quick access to songs and playlists.

### ChatterBox

Personal Project | Swift, Firebase, Google Sign-In, UIKit

- Implemented **Firebase authentication** with Email/Password and Google Sign-In, including login, signup, password reset, and profile editing.
- Built a **customizable chat UI** with options to modify backgrounds, colors, borders, and message styles.
- Enabled sharing of **images**, **videos**, **documents**, **contacts**, **camera photos**, and **live location** (Google/Apple Maps support).
- Added **message forwarding**, **media downloads**, and contact actions like **direct call** and **copy number**.
- Created **custom gradient image generation** for enhanced chat visuals.
